- Athlete's Foot
- Age spots
- Rosacea
- Sunburn

Commentary:

This herbal cream treats many types of **skin conditions**. Clinically it has been successful in treating many types of dermatitis which include acne, eczema, rosacea, sunburns, scrapes, bug bites, and more.

It was first formulated to treat burns for Radiation clients (Oncology) but over many years of usage its indications have been expanded. During the development stage of this product many clients commented on how smooth it made their skin feel.

Course of Treatment

For best results use 1.5cc-2.0cc on or near affected area three times daily for 90 days. Since clients tend to apply too much, we recommend that clients use a Q-tip to apply the product.
